Career objective

Passionate Computer Science graduate with a strong foundation in Artificial Intelligence, Machine Learning, and Generative AI. Skilled in Python, Large Language Models (LLMs), LangChain, and AI application development through hands-on projects. Aspiring to apply my skills in building intelligent systems that solve real-world problems and create meaningful impact.

Technical skills

Languages : Python, JavaScript, Java

Deep Learning : CNN, NLP, Model Fine-tuning

Gen AI & LLM Stack : Langchain, Prompt Engineering, RAG, LLM & FAISS

Markup Styling : HTML, CSS

Frameworks : React.js, AngularJS, PyTorch, Tensorflow, Scikit-learn.

Backend : Node.js

Database : MongoDB, SQL Basics

AI Tools & Platforms : Hugging Face Hub, Cursor AI, Claude

Version Control : Git, GitHub

Tools : Postman, Google Colab, Vidnoz, Pictory, InVideo

Concepts : Embeddings, OOP, REST APIs, Responsive Design

Professional Experience

Corporate Trainer

Adroit Technologies | Coimbatore | 2025 – Present

-Provide hands-on training in Python, AI, Machine Learning, Data Analytics, and current AI technologies, train students through real-time AI project implementations, coding, debugging, and practical application development.

-Work with real-time AI projects involving Generative AI, LLMs, RAG, Machine Learning, and related AI tools.

Full Stack Development Intern

Next Brain Technologies, Coimbatore | Jun – Jul 2024

- Built responsive ReactJS frontend components and integrated Node.js and MongoDB backend services.

Java Development Intern

TechnoHacks Edutech| Apr 2024

- Developed Java applications using OOP concepts with focus on application logic, debugging and input handling.

Research Intern

Noobtron Pvt Ltd, Chennai | Nov 2023 – Jan 2024

- Contributed to an Intrusion Detection System research project using 3DES and Blowfish encryption.

Projects

EchoTrace-Synthetic & Impersonated Speech Detection

Tech Stack: Python, Librosa, Machine Learning, Deep Learning

-Developed an AI-based system for detecting synthetic and impersonated human speech from audio samples.

Processed audio signals and extracted relevant acoustic features using Python and Librosa.
-Incorporated NLP techniques to process and interpret user queries for more accurate responses.
-Built a classification workflow to distinguish between genuine and AI-generated or manipulated speech

RAG Chatbot

Tech Stack: Python, FAISS, Sentence Transformers, Hugging Face Transformers

-Developed an intelligent Bank Chatbot that provides instant responses to customer queries by retrieving relevant information from banking documents and knowledge bases.

-Generated text embeddings using Sentence Transformers, performed semantic search with FAISS, and utilized a Hugging Face language model to generate accurate and contextually relevant responses.

AI Recruitment System

Tech Stack: Python, LLM, LangChain, Fast API, Prompt Engineering

-Developed an AI-powered Recruitment System to streamline the hiring process, manage candidate profiles, analyze applications, and identify suitable candidates based on job requirements.
-Implemented LLM-based candidate evaluation, intelligent resume screening, job-description matching, and AI-driven recommendations to support candidate shortlisting and improve recruitment efficiency.

Plant Disease Prediction System

Tech Stack: Python, CNN, TensorFlow, Computer Vision

-Developed a CNN-based image classification system to identify plant diseases from leaf images and

Pre processed and trained the model using plant disease image datasets.

-Implemented image-based prediction to classify disease categories from uploaded leaf images and generated disease predictions to support early identification and agricultural decision-making.

AI Voice Assistant

Tech Stack: Python, NLP, LLM, Speech Recognition, Text-to-Speech

-Developed a Python-based AI voice assistant capable of processing voice commands. Integrated speech recognition and NLP techniques to understand user requests.

-Implemented voice-based responses using text-to-speech. Added functionality for web searches, application launching, and general user queries.

Education

B.E. Computer Science and Technology (AI & DS) Vivekanandha College of Engineering for Women, Tiruchengode Nov 2021 – May 2025 | CGPA: 8.5

HSC – Sakthi Matric Hr. Sec. School, Kaniyamoor – 92% (2021)
SSLC – Sakthi Matric Hr. Sec. School, Kaniyamoor – 94% (2019)

Certifications

- Python for Data Science – IBM
- Data Visualization with Python – IBM
- Machine Learning with python – IBM
- Fundamentals of AI agents

Achievements

- Second Prize – Code Debugging Competition, VSB Engineering College, Karur
- Student Coordinator – Institution Innovation Council & Trendy Tech Club
- Executive Member – Eterna Department Association & Computer Society of India.
